Fantasia Bath House

Self-explanation

- Fantasia Bath House is the first European-Style Bath House and was built in 1887 in Baku. Location of the bath is 114 Chingiz Mustafayev Street.
- Don’t be put off by the grayish brown low heavy exterior façade of the building. It’s easy to walk right despite the fact that the building takes up an entire block. Pause and take a peak inside. You’ll be delightfully surprised how much this bathhouse lives up to its name—Fantasia.
- This building is not just an historic bathhouse, it offers a Tea Room where you can sit with friends and enjoy a cup of black or herbal tea, with a slice of lemon, sugar lumps or nuggets of hard candy. Don’t expect any other culinary delights like pastries, ice cream and exotic coffee flavors. Tea is the only beverage on the menu.
- Facade. Running water pours from lion’s mouth.
- Despite the elegance of the Tea Room, it is furnished with plastic table cloths on tables with folding chairs.
- Birds comprise part of the motif on the ceiling as well as for the pool. There are two birds on either side of the pool that spew water into the fountain from their backs. When plugged in, their eyes flash with red light.
- There are 26 private rooms for bathing.
